

# Isabel 6 : from signing the contract to using Isabel 6 the first time

## Step 1

### Application and contract

Congratulations! You are about to start working with Isabel 6 for the day-to-day management of your finances and therefore save precious time.

Your preferred bank will send your Isabel contract. Sign and return this document to your bank. Specify the bank accounts to be activated and the users that need to be created with their authorisations.

As soon as your Isabel card is ready you will receive a letter with your temporary password and an invitation to pick up your card from your bank.

## Step 2

### Installation of security components, activation of Isabel Secure Signing Card and subscription to modules.

Have your letter with your temporary password at hand and go to [www.isabel.eu/start](http://www.isabel.eu/start) to activate your card.

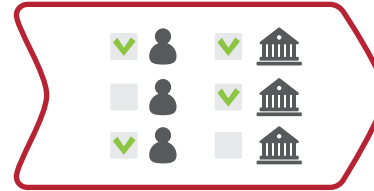

Follow the instructions to:

- ▶ install the security components;
- ▶ activate your card;
- ▶ replace the temporary password by your personal password.

Before you can use Isabel 6 you need to **'Subscribe to Modules'**. Select the modules you want to use. Please note: you can't use Isabel 6 if you don't select anything.

After making your choice, shut down the application and **wait 30 minutes** for your changes to be processed.

## Step 3

### Add users/accounts/banks

To add users, accounts or banks in Isabel 6, go to [www.isabel.eu/manage](http://www.isabel.eu/manage).

You then need to sign a contract with the banks in question who will create the additional users or activate additional accounts in your subscription.

## Ready

### Isabel 6 Quick guide

The 'Isabel 6 Quick guide' explains everything step by step. Make sure you have it close at hand when you start using Isabel 6. You will receive this guide with your Isabel card and it is also available on [www.isabel.eu/doc](http://www.isabel.eu/doc).
