<ul style="list-style-type: none"> Per additional bank (as from the second bank) 	€ 8.55 per month

Isabel Corporate Synchroniser	On demand
Exchanging large volumes of transactions automatically.	

Typical Configuration

Mark is an accountant at the ABC Company. He uses an accounting package that has been certified for Isabel 6. He prepares the national and foreign payments in the accounting package and synchronises with Isabel 6. Occasionally, he enters urgent payments manually. Every day, with a click on a button, Mark imports the bank statements into his accounting software for reconciliation. At the beginning of the quarter, he enters the electronic VAT return.

His boss, Lynn, validates and signs the payments for execution. She travels a great deal and wants to be able to sign on her laptop when away from home or the office, or in a hotel. Every day, she expects Mark to e-mail her a consolidated report with the status of ABC Company's eight accounts in two banks.

Mark needs: Isabel Secured Access + Isabel 6 Bankit Standard module + Export Bank statements + Isabel Go + MultiSign + 1 Additional Bank + Isabel Offline Reporting.

Lynn becomes a user of Isabel Secured Access and the Isabel 6 Bankit Signing module with one additional bank.

Total price of the subscription for the two users: **€ 87.31** per month.

Mark and Lynn also need their personal Isabel Secure Signing Card and Card Reader.

Entry-Level Configuration

Paul is Managing Director of Paul's Interiors. He prepares the national and foreign payments in the accounting software and imports them into Isabel 6. Occasionally, he enters urgent payments manually. Paul's external accountant processes the bank statements and the electronic VAT return.

Paul wants to sign his e-mails containing his business proposals electronically in order to avoid discussion.

Paul needs:

Isabel Secured Access + Isabel 6 Standard module

Total price of the subscription: **€ 19.14** per month.

Paul also needs his personal Isabel Secure Signing Card and Card Reader.

- Stay in control** - All transactions on all your accounts with all your banks. SEPA, national and international transfers or standing orders? You have an immediate overview of your financial situation. You can export reports in Excel or create these in PDF-format. And you always know who has input, signed and forwarded a transaction.
- Work efficiently** - Everyone uses the most recent version of Isabel on the Internet, regardless of where the person is. The data is centrally saved at Isabel, so you do not have to make back-ups anymore. Thanks to Isabel Go, the Isabel button in your accounting package, you exchange payments and account information directly with your banks. Endless retyping of data is over.
- Work together** - You do not manage payment transactions alone. Several users can share beneficiaries, transactions and account information. This is handy in the event of illness, traffic jams, holidays or a peak in work. The preparatory work is delegated in trust because signing is solely for authorised signatories. They are invited to sign by e-mail. Fast and simple.
